# THE DARK WATER VISIBILITY SOLUTION

Whether it's performing a repair, searching for evidence, or recovering a wreck, zero visibility conditions can hamper productivity and safety. Darkwater Vision systems use patented infrared camera technology to enhance the vision of the diver. Our special infrared light-and-camera system penetrates dark and turbid waters further than white light allowing the Darkwater Vision systems to see things that human eyes cannot.

Darkwater Vision technology is ideal for applications such as:

- SEARCH & RECOVERY
- EVIDENCE RECOVERY
- UNDERWATER CONSTRUCTION
- UNDERWATER INSPECTION
- SHIP HUSBANDRY
- OIL RIG INSPECTION
- TREASURE HUNTING
- ARCHAEOLOGICAL RESEARCH

Also fits Commercial Helmets
